

What is Pingeling?

Pingeling is the perfect tool to monitor servers and services.

You can use **Pingeling** to check if your favorite mail servers, web servers, ftp servers are still running.

Pingeling will show you the connection speed of those servers in stunning charts.

If any of your favorite servers is down, **Pingeling** will notify you (or others), either by email or by sending a sms message to your mobile phone.

Pingeling is available for both Mac OS X and Windows.

If you register **Pingeling** your number will be valid for both versions.

Just download the demo version and try out yourself.

Click [here](#) if you want to see **Pingeling** in action.
